

VISHWA BHARATH SINGH

B.Tech Artificial Intelligence & Machine Learning Student

Chennai, India | +91 8129713117 | vishwa.bharath.singh@gmail.com

[GitHub](#) | [LinkedIn](#) | [Portfolio](#)

SUMMARY

B.Tech Artificial Intelligence and Machine Learning student with hands-on experience building practical software and web applications. Strong foundation in Python, C, and C++, with project experience using React, Vite, and Node.js. Experienced in developing responsive user interfaces, structuring application logic, debugging software, and using Git and GitHub for project development. Interested in software development, artificial intelligence, and building practical technology solutions.

EDUCATION

Bachelor of Technology in Artificial Intelligence and Machine Learning

SRM Institute of Science and Technology | 2025 – 2029

TECHNICAL SKILLS

Programming Languages: Python, C, C++

Frameworks and Runtime: React, Vite, Node.js

Development: Web Application Development, API Integration, Responsive UI Development

Version Control: Git, GitHub

PROJECTS

F1 Racing Dashboard *React | Vite | Node.js*

[GitHub](#) | [Live Demo](#)

- Developed a web application for Formula 1 enthusiasts to access racing information and statistics.
- Built the frontend using React and Vite with a component-based application structure.
- Implemented reusable UI components to organize and present application data.
- Integrated application logic and data handling to provide an interactive user experience.
- Deployed the application as a publicly accessible web application.

Personal Portfolio *React | Vite*

[GitHub](#) | [Live Demo](#)

- Developed a personal portfolio website to showcase software projects, technical skills, and development work.
- Built the interface using React and Vite with reusable components.
- Structured project and profile information for clear presentation to recruiters and visitors.
- Deployed the portfolio as a publicly accessible web application.

PROGRAMMING EXPERIENCE

Software Development

- Developed programming projects using Python, C, and C++ to strengthen programming fundamentals and problem-solving skills.
- Built web applications using React, Vite, and Node.js.
- Practiced debugging, application development, and maintaining project code through hands-on development.
- Used Git and GitHub to manage source code, commits, branches, and project collaboration.
- Applied programming concepts to develop practical applications and improve software development skills.

AREAS OF INTEREST

Software Development • Artificial Intelligence • Machine Learning • Web Application Development
